**is-phone Portable:
iscoord's new carrier-class, lightweight, modular and platform independent UC client**

PRESS RELEASE

ZURICH, SWITZERLAND. March 18th, 2010 - iscoord ag, developer and leading provider of award-winning UC clients, announces the launch of is-phone Portable. iscoord will show the new is-phone Portable together with its entire product range at VoiceCon 2010 in Orlando, booth #736. is-phone Portable is a powerful RCP Java client, developed on the basis of iscoord's vast experience and know-how in integration and IP telephony. is-phone Portable's high customization level and its added value features supporting UC, OS, chat as well as PBX independency fully matches the needs of the telecom market. Dedicated options, based on different business models, and the modular setup of iscoord's technology allows the needed flexibility to launch scalable, competitive solutions for all emerging VoIP markets.

is-phone Portable complements iscoord's product range for leading UC clients. It relies on the proven development of iscoord's is-phone for IBM Lotus Notes/Sametime and is based on the Eclipse framework. The lightweight client runs on Windows/Linux/Mac platforms and meets customers' stringent requirements on security, deployment and provisioning. The application runs simply by starting an executable (.exe) file and can be used e.g. on USB sticks - with no installation needed and the settings can be pre-configured by OEM customers. Basic features like history, short dials, as well as LDAP are included in the basic version. Add-ons include CTI, audio/video conferencing, integration of text/display/video advertising, presence, as well as chat (e.g. MSN Live Messenger/Jabber/AOL/Yahoo etc.) and PBX of choice (e.g. 3Com/Alcatel/Asterisk (Digium)/BroadSoft/Cisco/Comverse/Genesys/MetaSwitch/Mitel/NEC/Nortel/ObjectWorld (AdTran)/OpenSIPS/sipfoundry etc.).

"Competition in the telecom market continues to increase, and existing players need to offer user-friendly communication tools, meeting customer demand", states Markus Sieger, CEO and President of iscoord. "We talked to our partners and there is a need for solutions to secure loyalty of existing customers. The market is seeking for proven solutions from a trusted supplier, and we are now earning the fruit of our effort to develop the most comprehensive, complete and flexible UC solution portfolio."

"Our senior development team did a great job in building an expandable, open UC client", states Rolf Kuster, Head of Development and Support at iscoord ag. "We have the ability to enable or add different kinds of existing modules, and are supporting all leading, carrier-grade back-end platforms, as well as public IM services. Due to several successful projects, we understand and can fulfill the security, deployment, provisioning and billing requirements and expectations of operators and integrators."

iscoord will showcase the full is-phone softphone product range including OEM versions of the is-phone communicator and the is-phone Assistant for BroadWorks Lotus Edition, the is-phone Portable and the is-phone for iPhone at VoiceCon 2010 (March 22-25, 2010, booth #736) in Orlando.
